DRIVE TOURER

Built for touring and endless exploration

Longer, lighter, faster. Sleekly cut, the 12', the Tourer Drive's speed is only matched by its stability. Built for touring and longer rides, the spear headed tip will cut through waves with ease and agility.

- ✓ MSL FUSION TECHNOLOGY DROP-STITCHING
- ✓ DOUBLE RAIL SIDE REINFORCEMENTS
- ✓ 12' x 32" x 6"
- ✓ FRONT AND REAR CARRY HANDLES

SIPABOARDS

About Tourer Drive:

The SipaBoards Tourer Drive is a board built for more. Faster, lighter and longer than other Drive Collection models, this spear-headed SUP will glide through streams wherever you take it. The extended waterline allows the SipaDrive to develop up to 7 km/h and add some power so that your rides can become full size explorations.

Sleekly cut for easy maneuverability and low drag, the Tourer Drive is extremely well balanced and stiff board. A perfect choice for experienced paddlers and those who cannot stop exploring the coastline.

Board description:

Built for speed, touring and coastline exploration. The Tourer is a sleek bodied 12'0" spear-headed board equipped with load straps, two side mounted D-rings and a rear mounted D-ring. The EVA snakeskin foam provides a supreme grip while still offering enough comfort for longer paddling sessions.

The Tourer is equipped with The SipaDrive® - SipaBoards' patented and CE certified fully-integrated Paddle Assist System. Designed to offer a safer and enhanced riding experience, it adds additional control over the board and ensures the rider ultimate control in varying paddling conditions. The **built in compressor** will inflate the board to **optimal pressure in 7 minutes**. Connected to a Bluetooth® remote control that can be mounted onto any paddle, the rider can start the inflation cycle, regulate the speed of their board and turn the LED lights on and off for a unique night time paddle experience.

The SipaDrive is powered by **144 Wha battery** in a watertight case, offering **up to 4 hours** of operation and speeds up to **7km/h**.

Specifications:

- Length: 12 feet (3.65 m)
- Width: 32.2 inches (82 cm)
- Thickness: 6 inches (15 cm)
- Volume: 320 l
- Weight of board with engine: 13.7 kg / 30.2 lbs
